

## **Specification Sheet**

## Carbon Monoxide Gas Sensor CO/C-200

CO Gas Sensor in Compact Housing

### **Key Features**

• Highly sensitive CO measurement

## **Applications**

- · Continuous Air Quality Monitoring
- · Safety and Environmental Control

### **Measurement**

| Operation Principle                        | 3-Electrode Electrochemical |  |
|--|-----------------------------|--|
| Nominal Range                              | 0 - 200 ppm                 |  |
| Maximum Overload                           | 400 ppm                     |  |
| Inboard Filter                             | -                           |  |
| Output Signal                              | 900 ± 300 nA/ppm            |  |
| Resolution (Electronics dependent)         | < 0.05 ppm                  |  |
| T90 Response Time                          | < 50 s                      |  |
| Typical Baseline Range (pure air, 20°C)    | -2 ppm to 2 ppm             |  |
| Maximum Zero Shift (+20°C to +40°C)        | see Graph                   |  |
| Repeatability                              | < 2 % of signal             |  |
| Output Linearity                           | Linear                      |  |
| Gain (Only applies to 4-Electrode sensors) | -                           |  |

## Carbon Monoxide Gas Sensor CO/C-200

## **Electrical**

| Rec. Load Resistor           | 10 - 33 Ω       |
|------------------------------|-----------------|
| Bias (V_Sens-V_Ref)          | not recommended |
| Conformity to RoHS directive | RoHS Compliance |

## **Environmental**

| Relative Humidity Range | 15 % to 90 % RH non-condensing |  |
|-------------------------|--------------------------------|--|
| Temperature Range       | -40 °C to 50 °C                |  |
| Pressure Range          | Atmospheric ± 10%              |  |
| Pressure Coefficient    | N.D.                           |  |
| Humidity Effect         | None                           |  |

## **Lifetime**

| Expected Operation Life                | 3 years in air                  |
|--|---------------------------------|
| Expected Long Term Output Drift in air | < 2 % signal loss per month     |
| Filter Life                            |                                 |
| Storage Life                           | 6 months in container           |
| Rec. Storage Temperature               | 5°C - 20°C                      |
| Warranty Period                        | 12 months from date of dispatch |

## **Cross Sensitivity Data**

The table below does not claim to be complete. Interfering gases should not be used for calibration. Please contact Membrapor AG for further support regarding cross sensitivities.

| Interfering Gas  | Concentration [ppm] | Reading [ppm] |
|------------------|---------------------|---------------|
| $H_2$            | 80                  | < 30          |
| H <sub>2</sub> S | 15                  | 45            |
| NO               | 40                  | < 20          |
| $NO_2$           | 13                  | -8            |
| SO <sub>2</sub>  | 15                  | 9             |

## Carbon Monoxide Gas Sensor CO/C-200

## **Temperature dependence**

The output of an electrochemical sensor varies with temperature. The graphs below show the temperature-dependent variation of baseline and sensitivity, respectively. The results shown here are raw data (batch average) without any post-processing steps. The sensitivity and baseline are referenced to the signal at 20°C (reference point).

Please note: It is highly recommended to acquire the temperature dependence curves with the whole instrument. The sampling system, the humidity, the electronics and the interaction between the electronics and the sensor have a significant impact on the temperature dependence of the final measurement reading.

Baseline shifted with respect to reference point at 20°C.
